DOWNLOADABLE AUDIOBOOKS

from Recorded Books and the Wheaton Public Library

NetLibrary enables you to download audiobooks to your personal MP3 player anywhere you have access to a computer. The collection of over 700 titles includes the Bible and a full range of language programs.

Before downloading you will need to set up a free personal NetLibrary account. Connect to the NetLibrary site from the WPL home page or online catalog by selecting "Audio Books Online" under Services on the left-hand side of the page. Then choose "create a free account" in the Login box on the right side of the NetLibrary page.

Once you have set up your account, you can access the NetLibrary site directly at www.netlibrary.com/RecordedBooks.

A list of supported listening devices is available in the Help section of the Net-Library page. Note: I-Pods are not compatible with NetLibrary. We recommend that you download Windows Media Player version 10 before making your NetLibrary selections.

NetLibrary titles check out for 21 days and may be renewed. You may have up to ten NetLibrary books checked out at a time.

If you need help with NetLibrary or just want more information, talk to staff in the Audio Department or phone 668-1374 ext. 29.
